Key Findings

Key Findings for England, Scotland and Wales	
Total number of cameras used by 2,107 schools	47,806
Number of cameras inside 2,107 school buildings	26,887
Number of pupils in the schools that responded to the FOI request	1,809,814
Number of cameras in changing rooms and bathrooms in 206 schools	825
The average number of cameras inside schools to pupils based on 47,806 cameras and 1,809,814 pupils	1:38
Average number of cameras in 1,537 Secondary schools	24
Average number of cameras in 570 Academies	30
% of schools with CCTV cameras	90%
% of schools that responded but refused our request for information	9%
Number of Local Authorities with double the average (27) number of CCTV cameras in England	24
Number of schools with a ratio of 1 camera to 15 pupils or higher in England	54
The estimated number of CCTV cameras in Secondary schools and Academies in England, Scotland and Wales	106,710

Key Recommendations

At present, we believe the Home Office's proposed regulatory structure is not fit for purpose.

1. The Home Office code of practice for CCTV cameras should apply to all publicly funded bodies
2. The Surveillance Camera Commissioner must have the power to enforce the Code of Practice and penalties for breaching the code must be available
3. The Government should commission an independent review of CCTV use in schools to explore the evidential basis upon which cameras have been installed. This should include ensuring any school using CCTV has appropriate policies in place so teachers and parents are fully aware of why surveillance is being used, when footage can be viewed and by who.

Our position

The use of surveillance cameras in schools is perhaps one of the most sensitive uses of CCTV. From concerns about who is viewing the images to the broader question of acclimatising children to an environment where surveillance is the norm, it is not a topic to be taken lightly.

Our research highlights how, as with local authorities, the use of CCTV varies massively from school to school. While of course local discretion is not a bad thing, the scale of variation does question how strategically CCTV is being used. Yet again CCTV appears to be used as a quick fix to much more complex problems and issues that simply cannot be solved with passive surveillance.

With some schools seeing a ratio of one camera for every five pupils, more than two hundred schools using CCTV in bathrooms and changing rooms and more cameras inside school buildings as outside, the picture across the country will undoubtedly shock and surprise many. To put into context the number of cameras, our research earlier this year found there are currently at least 51,600 CCTV cameras controlled by 428 local authorities.

Indeed, one of the key questions that arises from this report is the oversight of schools by local authorities and how the situation has reached this level without any concerns being raised.

The Home Office's proposed regulatory structure, a code of practice and a new post of 'Surveillance Camera Commissioner', is something we do not believe adequately addresses the situation. The proposals for a regulator with no enforcement or inspection power and a code of practice that is limited to cameras directly controlled by local authorities is simply not fit for purpose. If the Surveillance Camera Commissioner cannot intervene to force the removal of a camera in a school toilet, nor even demand access to inspect the camera, then we question the point of the commissioner's role being created at all.

While there has been little public outcry over an escalation in criminality in schools that would justify such a widespread use of surveillance equipment, we believe few parents will be aware of the true level of surveillance many schoolchildren are now under.

This report highlights an issue that has not been subject to any real public debate and we hope by highlighting the scale of the situation a proper debate can now take place about not only how to regulate CCTV, but also why surveillance continues to increase unchecked when there is still no academic research that suggests it is having a positive impact.

During the 1990s the Home Office spent 78% of its crime prevention budget on installing CCTV, and clearly schools have been investing significant resources in their own surveillance equipment.¹

We are aware of no research in the UK that has evaluated the use of CCTV cameras in schools. There is one study, conducted by the Île-de-France region (Paris and suburbs) in 2007, which found:

- 1) Theft and burglary continued to increase after the installation of the cameras
- 2) Where cameras are installed externally to prevent unwanted people entering, those people are able to 'play' the cameras and continue to enter
- 3) Their effectiveness is even less to fight against night time intruders
- 4) A marginal reduction in the level of disorder in schools²

Given the lack of research or data on this issue, we find it remarkable that so many cameras have been installed in the absence of any imperial data, or analysis of their benefits.

Whether or not many of these cameras are surveillance for surveillance's sake, if schools are not able to identify why they are installing cameras and then monitor if they are effective in achieving that aim it is impossible to justify such widespread surveillance.

The surveillance experiment of the past twenty years has failed to reduce crime or improve public safety. As schoolchildren across the country are now expected to accept surveillance for the formative years of their education, it is time for a different approach.

The Home Office Code of Practice on CCTV

Under the Protection of Freedoms Bill 2012 (Part 2, Chapter 1), the Home Secretary is required to prepare a code of practice containing guidance about surveillance camera systems.

The Act outlines that relevant authorities 'must have regard' to the code, however "a failure on the part of any person to act in accordance with any provision of the surveillance camera code does not of itself make that person liable to criminal or civil proceedings."³

Equally, the draft Code states "the commissioner has no enforcement or inspection powers."⁴

The code will apply to a limited range of organisations.

(33) Effect of code

(5) In this section "relevant authority" means—

- (a) a local authority within the meaning of the Local Government Act 1972,*
- (b) the Greater London Authority,*
- (c) the Common Council of the City of London in its capacity as a local authority,*
- (d) the Sub-Treasurer of the Inner Temple or the Under-Treasurer of the Middle Temple, in their capacity as a local authority,*
- (e) the Council of the Isles of Scilly,*
- (f) a parish meeting constituted under section 13 of the Local Government Act 1972,*
- (g) a police and crime commissioner,*
- (h) the Mayor's Office for Policing and Crime,*
- (i) the Common Council of the City of London in its capacity as a police authority,*
- (j) any chief officer of a police force in England and Wales.*

³ Protection of Freedoms Act 2012 s33(2)

⁴ Draft Code of Practice paragraph 12.3

Accordingly, schools will not be a relevant authority for the purpose of the Code, the Surveillance Camera Commissioner will not have power of enforcement or inspection, and it will not be a code to breach

In our opinion, a robust regulatory framework requires the following:

1. A single, straightforward point of contact to make and resolve complaints about CCTV cameras, including enforcement powers
2. A comprehensive code that covers cameras irrespective of their owner and is more focused on the purpose and operation of cameras
3. Clear, robust guidance on the information public authorities should be required to publish and have regard to when making decisions about the use of CCTV.

Given that it is likely a significant number of cameras will be covered by the Information Commissioner's Office CCTV guidance and not the Surveillance Camera System code, we would submit that the regime as envisaged is not fit for purpose.

We question whether it would be more appropriate to give the ICO the resources and additional powers to enforce its own existing code, rather than duplicating it and creating a SCC position which has neither enforcement powers nor investigatory authority.

Regional breakdown

Table 1: Full regional breakdown of figures

East Midlands	
Number of replies to FOI	150
Number of refusals	13
Total number of cameras	4,150
Number of cameras inside school buildings	2,498
Number of cameras in changing rooms and bathrooms	105
Number of pupils	136,839
Number of pupils to CCTV cameras ⁵	1:33

East of England	
Number of replies to FOI	153
Number of refusals	32
Total number of cameras	2,955
Number of cameras inside school buildings	1,630
Number of cameras in changing rooms and bathrooms	20
Number of pupils	114,061
Number of pupils to CCTV cameras	1:39

London	
Number of replies to FOI	171
Number of refusals	29
Total number of cameras	6,047
Number of cameras inside school buildings	3,988
Number of cameras in changing rooms and bathrooms	84
Number of pupils	160,735
Number of pupils to CCTV cameras	1:27

⁵ Total number of pupils from schools that responded to the FOI request. Number of cameras refers to total number of cameras

North East	
Number of replies to FOI	71
Number of refusals	5
Total number of cameras	1,814
Number of cameras inside school buildings	1,136
Number of cameras in changing rooms and bathrooms	3
Number of pupils	50,538
Number of pupils to CCTV cameras	1:27

North West	
Number of replies to FOI	167
Number of refusals	15
Total number of cameras	5,488
Number of cameras inside school buildings	3,593
Number of cameras in toilets and bathrooms	110
Number of pupils	150,538
Number of pupils to CCTV cameras	1:27

Scotland⁶	
Number of replies to FOI	528
Number of refusals	21
Total number of cameras	3,157
Number of cameras inside school buildings	1,341
Number of cameras in changing rooms and bathrooms	0
Number of pupils	222,916
Number of pupils to CCTV cameras ⁷	1:70

South East	
Number of replies to FOI	271
Number of refusals	13
Total number of cameras	7,151
Number of cameras inside school buildings	3,810
Number of cameras in changing rooms and bathrooms	144
Number of pupils	266,170
Number of pupils to CCTV cameras	1:37

⁶ Some Scottish council's submitted their schools data in a single response. Glasgow City and North Lanarkshire Council's did not distinguish between the number of cameras in primary and secondary schools.

⁷ The pupils to CCTV cameras ration for Scotland will appear higher than average due to the number of pupils relating to only Secondary schools and the Total of number of cameras, in cases noted, relating to some primary schools

South West	
Number of replies to FOI	170
Number of refusals	14
Total number of cameras	4,098
Number of cameras inside school buildings	2,160
Number of cameras in changing rooms and bathrooms	90
Number of pupils	159,160
Number of pupils to CCTV cameras	1:39

Wales	
Number of replies to FOI	55
Number of refusals	8
Total number of cameras	1,214
Number of cameras inside school buildings	734
Number of cameras in changing rooms and bathrooms	5
Number of pupils	46,720
Number of pupils to CCTV cameras	1:38

West Midlands	
Number of replies to FOI	230
Number of refusals	21
Total number of cameras	6,023
Number of cameras inside school buildings	3,477
Number of cameras in changing rooms and bathrooms	124
Number of pupils	183,620
Number of pupils to CCTV cameras	1:30

Yorkshire and Humberside	
Number of replies to FOI	147
Number of refusals	17
Total number of cameras	4,095
Number of cameras inside school buildings	2,520
Number of cameras in changing rooms and bathrooms	202
Number of pupils	136,877
Number of pupils to CCTV cameras	1:33

Local Authorities

Table 2: Local authorities with a higher than average number of CCTV cameras.⁸

	Local Authority	Number of responses	Number of CCTV cameras ⁹
1	Knowsley	7	129
2	Sutton	2	106
3	South Tyneside	1	83
4	Manchester	4	82
5	Tower Hamlets	5	79
6	Brighton and Hove	4	72
7	Ealing	4	69
8	Telford and Wrekin	5	66
9	Sheffield	10	66

Table 6: Number of schools per region with cameras in bathrooms or changing rooms.

Region	Number of schools
South East	42
Yorkshire and Humberside	33
North West	28
London	27
West Midlands	26
East Midlands	23
South West	21
East of England	7
North East	0

Appendix 1: Methodology

Starting on the 14th May 2012, a Freedom of Information request was sent to 4,092 secondary schools. In this request we asked for the total number of cameras on the premises, the number of cameras inside, the number of cameras inside bathrooms and changing rooms and the number of pupils. We received responses from 2,107 schools.

For the purposes of this report we included all responses received up to and including 3rd September 2012.

Due to the sensitive nature of the data many schools asked us not to release their individual details. We are happy to respect this concern and disclose information responsibly. Accordingly, we have decided to not make the following information available:

- A full list of every school and how many cameras they have
- A full local authority breakdown.

This decision has been made in order to not highlight areas of the country where there are no cameras.

Appendix 2: Freedom of Information Request

Freedom of Information Request

Dear **School X**

As an organisation in receipt of public funding, your school is included under the terms of the Freedom of Information Act. This means that members of the public are able to request information, and under the Act I would like to request some details of your school's use of CCTV.

Specifically, I am writing under the terms of the Act to request information relating to the use of CCTV and biometric identification systems in your school. I am especially interested in the number of cameras your school may operate, the location of these cameras and the use of biometric identity technology by your school.

If you are able to provide answers to the following questions, it would be appreciated.

- 1.) The total number of CCTV cameras on your school premises as of 1st May 2012;
- 2.) The number of CCTV cameras located inside school buildings as of 1st May 2012;
- 3.) Are any of these cameras located in school changing rooms or bathrooms as of 1st May 2012?
- 4.) Whether parents of pupils enrolled in the school were consulted about the installation of CCTV before it's installation
- 5.) The number of pupils enrolled in your school as of 1st May 2012
- 6.) Details of any internal guidance document relating to the use of the above technologies

Under the terms of the Act, you have an obligation to provide any information that you hold within twenty working days. I would be grateful if you could confirm receipt of this request as soon as possible. My preferred means of receiving information is electronically, but I am happy to accept postal copies.

About Big Brother Watch

Big Brother Watch was set up to challenge policies that threaten our privacy, our freedoms and our civil liberties, and to expose the true scale of the surveillance state.

Founded in 2009, we have produced unique research exposing the erosion of civil liberties in the UK, looking at the dramatic expansion of surveillance powers, the growth of the database state and the misuse of personal information.

We campaign to give individuals more control over their personal data, and hold to account those who fail to respect our privacy, whether private companies, government departments or local authorities.

Protecting individual privacy and defending civil liberties, Big Brother Watch is a campaign group for the digital age.

If you are a journalist and would like to contact Big Brother Watch, including outside office hours, please call +44 (0) 7505 448925 (24hrs). You can also email press@bigbrotherwatch.org.uk for written enquiries.
